Ehud,

I know of these guys.
They are competitive to GuardiCore (may have borrowed some ideas from GC). As far as I know they are far behind us on technology and business.

The founding team mostly served as technicians in our units and in the air-force.

Regards, Pavel

נושא: Javelin-Networks Introduction

Hi Udi,

Following our conversation today here is an introduction for our technology and perspective.

Attached also our company deck for better understanding.

Introduction:
Javelin Networks brings the uncompromising cyber security approach from the Israeli military to enterprise networks.
Acknowledging every perimeter defense can be breached, Javelin provides real-time detection of malware within the perimeter.
The solution is based on deceiving intruders with constantly morphing tripwires that identify malware immediately while not allowing intruders to learn the defense.
The result is real-time detection at the highest rates possible with zero false alarms and no denigration of network performance.

Best,
--
